

Exchange Advantage
A Fortified Digital Transformation

Achieve More Accurate Order Transaction Data, Boost Efficiency and Accelerate from Order to Invoice

Digitize high volumes of order transactions with Exchange Advantage — a single connection to healthcare's leading digital trading network. This provides a foundation to efficiently scale operations as you grow. Business rules and automated catalog distribution work together to improve order transaction data accuracy and deliver a smoother transaction experience. Robust analytics and insights reduce guess work and friction in downstream processes so you can focus on more high-value strategic actions.

Key

Benefits

Reduce dependence on manual exception resolution with advanced logic incorporating machine learning and custom rules

Map information at item level including item quantity, unit of measure and description, to enrich your data and improve accuracy

Build supply chain resiliency with visibility to the root cause for exceptions

Gain insight with interactive and configurable analytics tools

Collaborate with customers to resolve exceptions with visibility to more accurate order transaction data

Lessen the strain on internal technology resources by reducing the burden of maintenance and testing on multiple point-to-point connections

Enable more time to focus on high-value growth activities and away from manual tactical tasks

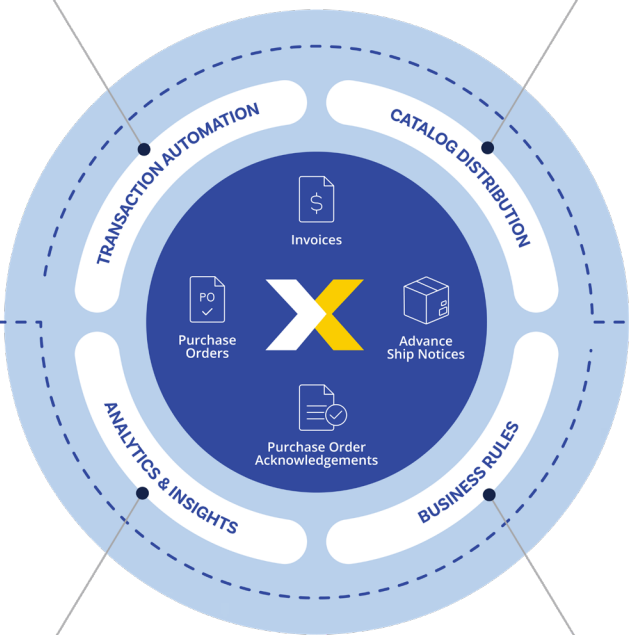

Run a Fast Track from Order to Invoice when Working with More Accurate Order Transaction Data

Digitize purchase orders, order acknowledgements, advance ship notices and invoices with more customers

Automate product data distribution to efficiently provide customers with your most current catalog items and up-to-date product information

PROVIDERS

SUPPLIERS
