

ePay

A SMARTER APPROACH TO ACCOUNTS PAYABLE

GHX ePay can help transform your Accounts Payable department

In light of uncertainty in the healthcare landscape, it's no longer sufficient to focus on saving here or there, or to capture a few extra rebates. Forward-thinking organizations are looking for a technology solution that helps them adapt, evolve, and move toward opportunity. Built by healthcare, for healthcare, our unified payment platform provides innovative ways to streamline and optimize the AP process across your entire trading partner network by:

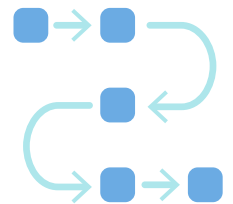

INCREASING
cash rebates with
multiple payment
methods

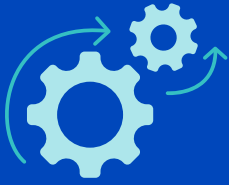

ENABLING
more early
payment discounts

ELIMINATING
labor-intensive
paper checks and
reconciliation tasks

ESTABLISHING
an efficient, more
accurate process

Move toward a holistic, touchless strategy with ePay

When AP, supply chain, sourcing, and procurement collaborate to move toward a more touchless procure-to-pay process, the entire healthcare organization can transform for the better. Integrate GHX ePay with our e-commerce and contracting solutions for ongoing improvement.

Take advantage of healthcare's largest pre-established supplier payment network with minimal effort

GHX ePay is the only healthcare-focused collaborative payment platform that benefits both providers and suppliers. Terms are pre-established with participating vendors, helping AP increase efficiencies and revenue and strengthen supplier relationships. It's a smart step toward a touchless procure-to-pay process.

With GHX ePay, you can:

- Pay suppliers with multiple payment methods including ACH, Cards and Line of Credit
- Expand automation to your payments and away from manual paper checks
- Increase revenue by maximizing early-pay rebates
- Pay invoices efficiently and seamlessly from one consolidated file
- Work with your existing bank partners or leverage GHX's multi-bank network
- Implement quickly with minimal training and IT involvement

A unified payment platform enabling providers to maximize the value of automated payments
