

Item ConneXion

Content management solution for smaller hospitals.

Operating with fewer resources doesn't mean you have to sacrifice accuracy in your item master data. Item ConneXionSM offers access to product data that is accurate, up-to-date and standardized to help realize significant savings through reduced ordering errors.

Item ConneXion provides a content management solution for smaller hospitals operating with lean infrastructure to improve consistency and accuracy in your item master — and with better data management comes more control over your purchasing process.

Item ConneXion is a self-service, web-based item catalog application that provides on-demand access to the GHX proprietary catalog. Once implemented, smaller healthcare systems are equipped to build and maintain a more accurate item master with the flexibility to create multiple item descriptions—valuable for all downstream systems where those items may be used. Access to more accurate data for your item master helps to reduce exceptions and improve efficiency for end-users of supply chain data.

FEATURE	BENEFIT
Rapid implementation	Quickly take advantage of GHX's proprietary item catalog without integration delays
Access and search an online three-million item, industry-wide catalog (AllSource Prime)	On-demand source of accurate product information with customized descriptions
Access to GHX Power Sourcing feature	Save time with bulk upload ability and return matched items from AllSource Prime
Create and maintain a robust description management protocol	Utilize abbreviations, UNSPSC categorization and rule based description schemas to serve multiple needs, including clinicians'
Current product information	Access to up-to-date supplier information
Optional HCPCS	Increase reimbursement revenue potential with visibility into HCPCS-coded items

➤ Key Features of Item ConneXion

AllSource Prime and Power Sourcing are valuable tools to help achieve the accurate and standardized supply chain data needed to drive down costs.

Greater Efficiency for Lean Organizations

Power Sourcing delivers value in three key ways – efficient bulk processing of item information, the ability to locate and add unfamiliar items to your item master, and to enrich item data. Power Sourcing allows you to load files in real time for cleansing and gather the information your organization needs to appropriately build out the item master.

Access to a Vast Supply of Enriched Data

AllSource Prime delivers enriched product data to better meet requirements across your organization. A robust description management functionality allows the creation of multiple descriptions, including custom abbreviations and attribute order. These descriptions can be tailored to meet the needs of ancillary systems, including electronic medical record.

➤ GHX Global Network

The largest community of healthcare supply chain trading partners, the GHX Global Network connects supply chain, finance and clinical professionals with their suppliers and partners. The 4,000+ provider organizations and 400+ manufacturers and distributors in this community are working together to drive billions of dollars out of the cost of the healthcare supply chain.
